

Lab 1: Getting Started with the Fabric Data Agent Tutorial

Pre-requisites

1. You should have received a slip that includes username and password. If you have not, please raise your hand, and a proctor will get you one shortly.
2. If you have not yet please download all the required content from:
<https://aka.ms/fabcone25-dataagent-tutorial>

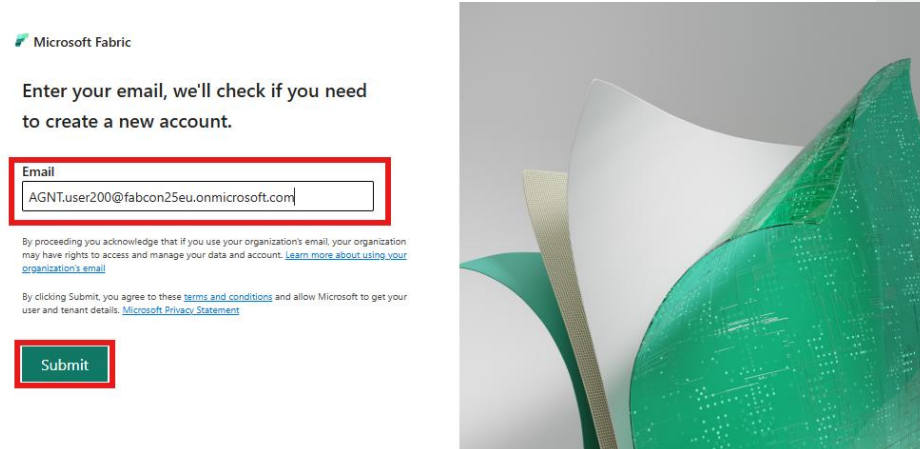

Learning Objectives

1. Log into your Fabric Account
2. Familiarize yourself with the Fabric Workspace
3. Create a Data Agent

Step 1: Log into your Fabric Account and Open your Workspace

1. Open your browser in **Incognito Mode**
2. Go to [Microsoft Fabric](#), input the username from your slip and hit submit:

Commented [MD1]: Might want to recommend people open in incognito mode

Microsoft Fabric

Enter your email, we'll check if you need to create a new account.

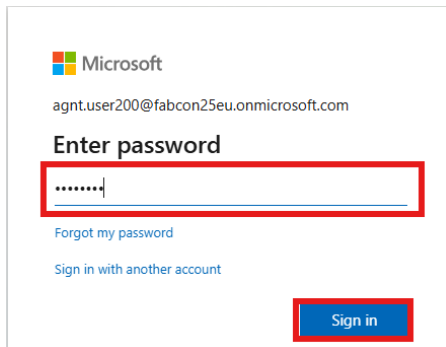

Email
AGENT.user200@fabcon25eu.onmicrosoft.com

By proceeding you acknowledge that if you use your organization's email, your organization may have rights to access and manage your data and account. [Learn more about using your organization's email](#)

By clicking Submit, you agree to these [terms and conditions](#) and allow Microsoft to get your user and tenant details. [Microsoft Privacy Statement](#)

Submit

3. Enter the password and click 'Sign in'

Microsoft

agnt.user200@fabcon25eu.onmicrosoft.com

Enter password

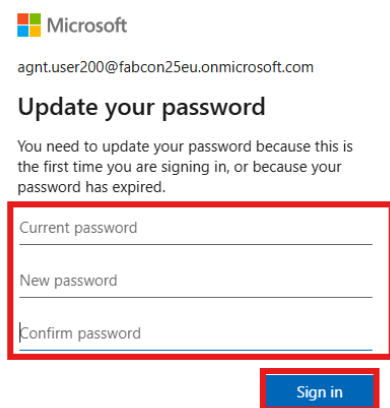

.....

[Forgot my password](#)

[Sign in with another account](#)

Sign in

4. Input your old password and new password. Then hit "Sign in" (Please DO NOT forget this password for the rest of today)

Microsoft

agnt.user200@fabcon25eu.onmicrosoft.com

Update your password

You need to update your password because this is the first time you are signing in, or because your password has expired.

Current password

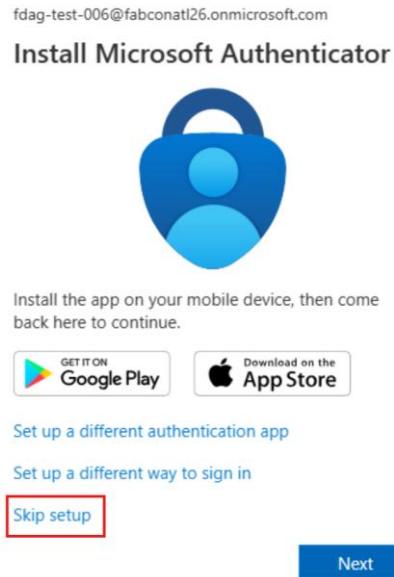

New password

Confirm password

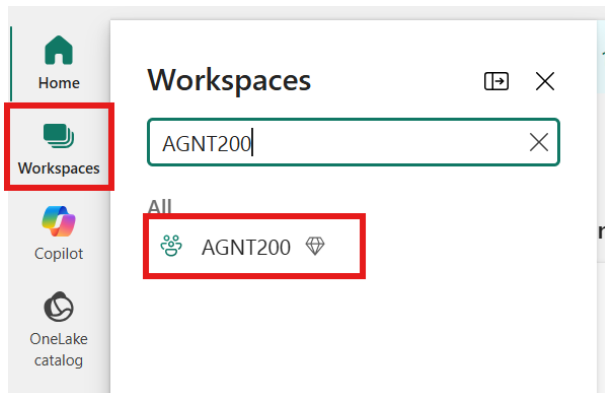

Sign in

This account is officially yours!

5. If prompted, skip Microsoft Authenticator Setup:

6. You should be on the Fabric Landing Page. Let's start by navigating to your workspace. You should have also received a "Workspace Name" as part of your account slip.
Select "Workspaces" in the multi-tasking navigation bar -> Search for your Workspace name -> Open the workspace.

7. Confirm you have the following notebooks and data sources in your workspace:
- a. A semantic model called “ecommerce-dataset”
 - b. A lakehouse called “ecommerce_lakehouse”

	create_views	Notebook
	ecommerce-dataset	Semantic model
	ecommerce_lakehouse	Lakehouse
	ecommerce_lakehouse	SQL analytics endpoint
	Lab3_Evaluation	Notebook

Note: If you do not, please raise your hand and a proctor will be with you shortly

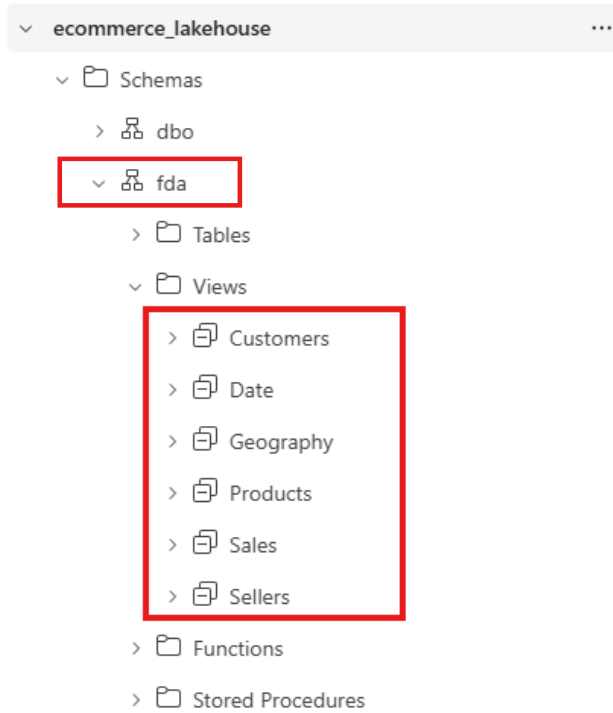

8. Open the Lakehouse:

	create_views	Notebook
	ecommerce-dataset	Semantic model
	ecommerce_lakehouse	Lakehouse
	ecommerce_lakehouse	SQL analytics endpoint
	Lab3_Evaluation	Notebook

9. Switch to the T-SQL Endpoint:

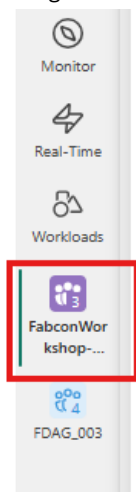

10. Confirm you see the following Views loaded into this lakehouse:

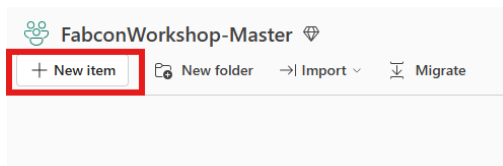

Note: If you do not, please raise your hand and a proctor will be with you shortly

11. Return to your workspace by clicking on your workspace in the multi-tasking navigation bar:

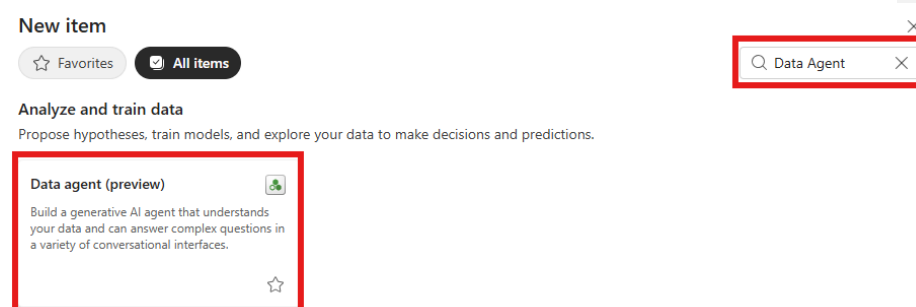

Step 2: Creating your Data Agent

1. Click “+ New Item”

2. Search for “Data agent” and select the “Data agent” card:

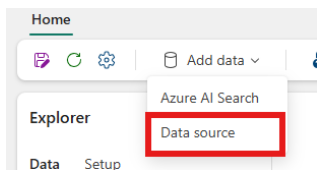

3. Name your agent “ECommerceAgent” and click “Create”

Create data agent

ECommerceAgent

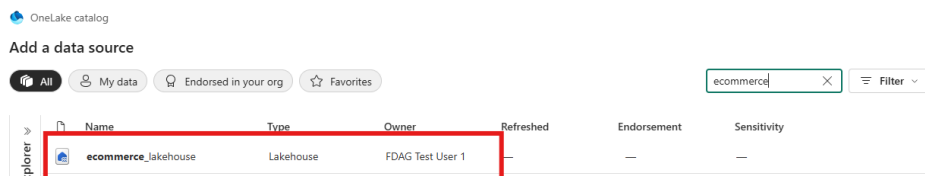

Create Cancel

4. Click on “Add data” and select “Data source”

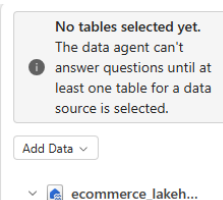

5. Here, you may choose your data source: the ecommerce lakehouse or the ecommerce semantic model. This is your choice. The data is the same across both sources.

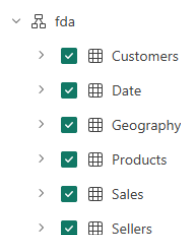

If this is your first time using Fabric, **we recommend selecting the ecommerce lakehouse.**

6. You should see the data source in the object explorer.

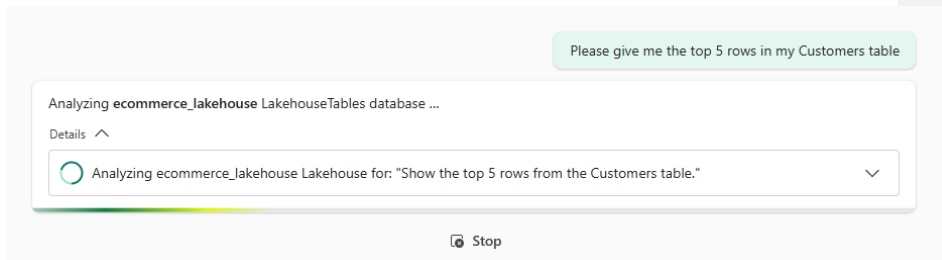

7. If you are using a **Lakehouse** Select all tables/views under “fda”:

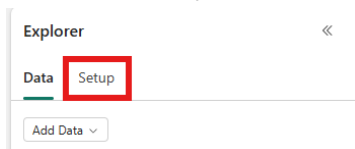

If you're using **Semantic Models**, select all Tables:

- ▼  ecommerce-dataset
 - >   Currency
 - >   Customer Geography
 - >   Customers
 - >   Date
 - >   KPI Selector
 - >   Products
 - >   Sales
 - >   Scenario
 - >   Seller Geography
 - >   Sellers
 - >   Time Calculation
 - >   Total Measures

8. Ask your first question to Data Agent:
“Please give me the top 5 rows in my Customers table”

9. While we wait for the speakers to start their presentation, spend some time exploring the Data Agent.
- Can you use the UI to identify what query was used to generate the result?
 - What's in the Setup tab?

- c. Ask some follow-up questions based on the initial result.

We will dissect the Data Agent shortly and start walking you through some capabilities within the Data Agent.

End Of Lab 1

Congratulations! You've finished your first lab!

If you have finished early, please use the time to relax, grab a cup of coffee, and say hello to our speakers 😊
